

684

This image shows the top layer of a printed circuit board (PCB) layout. The board is rectangular with a complex pattern of white conductive traces on a black background. A large white rectangular area is located in the upper left. A label '684' is positioned in the upper left corner. The layout includes various circular pads, some with concentric circles, and a central diagonal trace connecting different sections of the board. There are also several small square and rectangular pads scattered throughout.

This image shows the bottom layer of a printed circuit board (PCB) layout. The board is rectangular with a complex pattern of white conductive traces on a black background. A label '684' is positioned in the lower right corner. The layout features a large, intricate network of traces in the center and lower right, with several circular pads and a prominent circular feature with a crosshair-like pattern in the upper right. The overall design is symmetrical and detailed.
